

WABASH COUNTY HEALTH DEPARTMENT

89 West Hill Street
Wabash, Indiana 46992
(260) 563-0661 Ext. 1251

The Environmental Health Office requires that all residential on-site sewage disposal systems have the area of the absorption field undergo evaluation with a consult from a certified soil scientist. We can not proceed with your permit process until after this report has been received.

You are welcome to contact any of the states certified soil scientists. We have made a list of a few who frequently work in our county for your convenience. A complete list is available on line at [www.isco.purdue.edu/irss/roster/html].

A soil evaluation is one step in the permitting process. A soil survey does not guarantee a permit will be issued, nor can it guarantee the failure or success of an on-site sewage disposal system. Minimum requirements will be based on the results from the soil evaluation. Please contact the office at 260-563-0661 ext. 251 with any questions or concerns that you may have.
